Canoas, RS. Brazil

OBJECTIVES

Systems Analysis and Development student with advanced English, seeking my first internship in the technology area. Looking for opportunities to apply academic knowledge in computer networks, logical thinking, and programming languages to contribute to team projects, deliver efficient solutions and organize IT activities.

SKILLS

Languages

C (programming language), MIPS, HTML, CSS, Javascript, Typescript.

Soft Skills

Technical resilience, attention to detail, fast learner, active listener

Concepts

Algorithms, computer networks, computer architecture.

Tools

Office 365, Dev - C++, GitHub, Git, React, VScode, Cisco Packet Tracer, Vite.

EDUCATION

Systems Analysis and Development

Instituto Federal de Educação, Ciência e Tecnologia do Rio Grande do Sul

Current semester: 2nd

Expected graduation: 02/2028

ADDITIONAL EDUCATION

English course (332.5h)

CCAA - Canoas

Current at level 9 (Advanced English)

Expected Completion: 01/2027

Computer networks: From basic to advanced

Udemy | 22h | 2026

Instructor: Wesley Ávila

PROJECTS

Computer network simulation | Cisco Packet Tracer

[\[View project on Github\]](#)

Description: implemented a simulated network architecture to connect two different branches, focusing on capacity, process automation, and data security.

Digital Oracle: algorithmic randomization and glassmorphism UI | Website

[\[View project on GitHub\]](#)

Description: developed of an interactive web application designed to simulate a mystical oracle, dynamically drawing insightful messages from a curated dataset. Built with React and TypeScript.

Cozy Mood Tracker: unidirectional data flow and responsive state management | Website

[\[View project on GitHub\]](#)

Description: developed of a responsive Mood Tracking application designed to map and centralize daily emotional metrics. Built with React and TypeScript on top of Vite, comforting user interface.

Bookstore inventory and sales simulator | C language

[\[View project on Github\]](#)

Description: developed of a CLI (Command Line Interface) Bookstore Management and Transactional System in C.
